

## CONVEYORS WITH A MOVER KIT MOVER KIT CAMERA PACKAGE INSTALLATION GUIDE

The camera package comes with the monitor already mounted inside the box. A length of cable and conduit is included.

1. The box is to be mounted standing up on its legs, over the valve table.
2. There are 2 bolt holes at the rear corners of the table where the legs of the camera box is attached to.
3. The engine control box will need to be removed from the back of the table.
4. Remove the junction box mount from the other side of the valves.
  - Attach the leg to the existing bolt holes in the frame.
  - Reinstall the junction box over the camera box leg.
5. Once the camera box is securely attach over the valve table, bolt the engine control box onto the frame beside the camera box.

Installation is complete.
